PROJECTS

Home Network Simulation in Cisco Packet Tracer
October 2023

- Designed and built a simulated **home network** with multiple devices and services
- Configure and troubleshoot network settings to optimize performance
- Implemented cybersecurity protocols aligned with modern standards

SOC Automation Project: Wazuh, TheHive, Shuffle
August 2024

- Developed an **automated SOC environment** using Wazuh for security monitoring, TheHive for incident response, and Shuffle for orchestration
- **Automated threat detection**, incident response workflows, and **log management** to enhance security efficiency
- Integrated the solution with modern cybersecurity frameworks to **reduce response times** and improve operational security

EDUCATION

Ritsumeikan University - *Information Systems Science and Engineering Course*
Expected Graduation: MARCH 2026

CERTIFICATES & CERTIFICATIONS

Google Cybersecurity Certificate - *Online Certificate*
Training Period: AUGUST 2023 - SEPTEMBER 2023

CompTIA Security+ ce - *Certification*
Issued: MARCH 2024

SKILLS

- **Programming Languages:** Python, JavaScript, C, HTML5/CSS
- **Cybersecurity Skills:** Packet Analysis with Wireshark, Network Security, Security Monitoring, Incident Response, Security Orchestration, Threat Detection, Log Management, Cybersecurity Protocols, SOC Automation.
